

STAY SAFE ONLINE

Top 6 Cyber Safety Tips for High School Students

In 2023, 1 in 5 Australian teens experienced cyberbullying — eSafety Commissioner

Lock Down Your Socials

1

Set Instagram, TikTok and Snapchat to Private. Only let people you know IRL follow you — strangers don't need access to your life.

Report Cyberbullying — Don't Retaliate

2

Screenshot evidence, block the person, and tell a trusted adult. Replying usually makes it worse. Platforms act fast on reports.

Check What Your Apps Can See

3

Does a game app need your contacts? Go to Settings > Apps and revoke any permissions it doesn't actually need.

Stay Safe While Gaming Online

4

Never share your real name, school, or location in-game. Use a gamertag that reveals nothing personal about you.

Use a Strong, Unique Password

5

Use a different password for every account, 12+ chars. Bitwarden (free) remembers them all for you.

Think Before You Post — It Lasts Forever

6

Once posted it can be screenshotted and shared instantly. If you wouldn't want a teacher to see it, don't post it.
