

Phishing Detection Quiz

B21 — Can You Spot the Phish? | CITS2006 Portfolio — Justin Roy

Name: _____ Date: _____ Score: _____ / 5

Q1 Which of the following is the STRONGEST indicator that an email is a phishing attempt?

- a) The email is written in English
- b) The sender's display name says 'PayPal Support' but the actual email address is paypal-support@gmail.com
- c) The email contains a logo
- d) The email asks you to log in to your account

Your answer: _____

Q2 You receive an email saying: 'Your account will be SUSPENDED in 24 hours unless you verify immediately!' What technique is the attacker using?

- e) Encryption
- f) Spoofing
- g) Urgency / fear-based social engineering
- h) Brute force

Your answer: _____

Q3 Before clicking a link in an email, what is the safest action to take?

- i) Click it quickly to see if the page looks real
- j) Hover over the link to preview the actual URL before clicking
- k) Forward the email to a friend to check
- l) Reply to the sender to ask if the email is real

Your answer: _____

Q4 An email from 'UWA IT Support' asks you to reset your password via a link. The URL shown is: <http://uwa-it-reset.com/login> (note: the 'a' in 'uwa' is a Cyrillic character). This is an example of:

- m) A legitimate IT request
- n) A homograph / lookalike domain attack
- o) A man-in-the-middle attack
- p) Cross-site scripting

Your answer: _____

Q5 If you receive a phishing email at your university account, what should you do?

- q) Click the link to report it directly on the website
- r) Reply to the sender and tell them you know it is a scam
- s) Report it to IT/security via the official reporting method, and delete it without clicking any links
- t) Ignore it — phishing emails are harmless unless you give them your password

Your answer: _____

Answer Key (Facilitator Only): Q1 — b Q2 — c Q3 — b Q4 — b Q5 — c

Each correct answer is worth 1 mark. A score of 4–5 indicates the learning objectives have been met.
